

Production technician

HPNow is looking for an experienced and motivated production technician to be part of our team for the development and production of a new generation of water treatment devices. Our technology is based on electrolysis and a key focus is on the production of high-quality electrodes and electrochemical cells. You will be tasked with production processes and laboratory work including deposition techniques, production of dispersions and stack assembly. Together with our production team, you will carry out the production processes and help improve the quality and performance of our devices. The position is full time and based in our headquarters in central Copenhagen, Denmark.

Your main responsibilities

- Operation of deposition equipment for production of electrodes
- Assembly of electrochemical cells
- Documentation and registration of laboratory processes
- Keeping track of laboratory consumables and organizing the production environment

Who we are looking for

You should have a minimum of three years of hands-on experience in similar positions in a commercial company, preferably in the chemical industry. Your education could be as a production technician, laboratory technician, or alternatively you have acquired equivalent qualifications through relevant experience. You have a good attention to detail and enjoy taking responsibility of processes in the laboratory. We are especially looking for and will value the following:

- Flair for making processes more efficient
- Motivation for high quality production
- Good time management
- Interested in working with new technology

Importantly, you can adapt to the nature of a fast-growing startup. You can work in a team while being able to work independently. You have a structured and thorough approach to your tasks and feel comfortable communicating in English.

We offer

A motivating position in a thriving organization with great opportunities for self-development. The systems you work on will have a tangible impact on our customers and the environment. We are a young and passionate team working together to achieve our ambitious goals, and we have a collaborative approach to our challenges.

Please send your application to info@hpnow.eu with the title 'Production technician'. Attach your CV, cover letter and a copy of your transcript of records. For more information, contact rafr@hpnow.eu

Application deadline: 9/12/2018

About HPNow

At HPNow (www.hpnow.eu) we believe water treatment can be simpler, more efficient and sustainable. We are pioneering a novel on-site, on-demand hydrogen peroxide generation technology with strong potential across multiple fields and applications. By doing so, we contribute to advancing global climate and environment objectives while having a positive impact on the bottom line of our customers.
